

Building Management Systems

Global Financial Institute

This was a fit-out of office space to suit Category B requirements. The project involved the strip out and replacement of base build closed protocol building management system (BMS), while completing the fit out works at the same time.

Integration was also carried out with LON-based terminal units and computer room packaged A/C units, which had been pre-ordered by the client.

“Very demanding fit-out programme with the added challenge of replacing the base build system in the same timeframe. The project was completed on time and on budget.”

Client: ISG InteriorExterior
System: Trend & LON Integration
Duration: 7 Months
Value: £1.3 Million
