

Carrier Corp. Acquires the Controls Businesses of i2S Group

Carrier Corp., a unit of United Technologies Corp. (NYSE:UTX), has acquired the controls businesses of the i2S Group: DMS Controls, Ltd., ESL, Ltd., and i2S Service, Ltd.

Collectively, these companies design, install and service complete building management systems, primarily for commercial office buildings in the United Kingdom, where they have a proven record of customer success.

“The acquisition of i2S Group’s controls business further enhances Carrier’s building management systems capabilities in Europe,” said David Appel, president, Carrier HVAC Europe Middle East and Africa. “This will enable Carrier to provide a comprehensive set of products and services to meet its customers’ needs for ease of control and energy savings.”

Kerry Overman, managing director, DMS Controls, Ltd., commented, “I am proud that the success of DMS Controls, ESL and i2S Service and their vast knowledge of building management systems have attracted such a prestigious company as the Carrier Corporation. The future opportunities that this acquisition will bring to both Carrier UK and DMS Controls are interesting and exciting and mark the next stage of our growth as one of the United Kingdom’s premier controls companies.”
